STONE & SURFACES SHOW

THREE SHOWS, ONE SUPER EVENT

12 - 14 May 2026

The UK's largest built environment super event

One destination. Three events. Record engagement across the built environment.

The UK's Built Environment Super combined UK Construction Week London, Futurebuild and The Stone and Surfaces show to create a must-attend annual gathering uniting the full supply chain under one roof including specifiers, architects, contractors, developers, manufacturers, policymakers and industry leaders.

Across three dynamic days the combined event created an unrivalled platform for discovering innovation, increased knowledge sharing, expanded networking and more commercial opportunity with visitor numbers doubling. The result was one of the most energetic, collaborative and commercially successful gatherings the sector has seen.

Don't Just Take Our Word For It

We've had a lot of traction and a good number of interest and leads particulary from C-Suite professionals. Our demonstrations on the Live Demo Stage have been really popular, especially for showcasing our heavy duty tools. It's also been a great opportunity to invite our exisiting customers along to the show to learn about our new products.

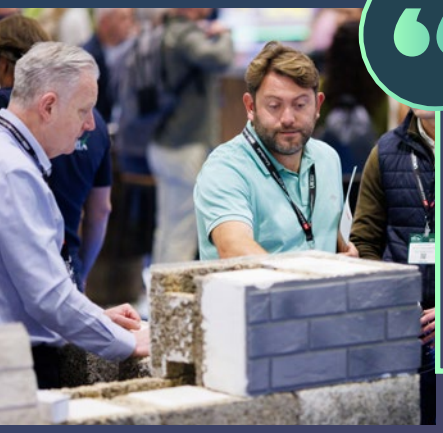
Annie Spooner, Trade Manager, Hilti

It's our first time at UKCW; we're a digital marketing agency which specialises in construction, and we've done lots of business and had lots of fun! We're definitely coming back - 100%.

Charlie Brown, Technical Manager, Why Media

We're a couple of years into a start-up; a couple of big projects are coming to and end, so we're here to network and prospect. First impressions? It's massive - a lot going on! It's really good it's split into different sections.

Sam Jenkins, Managing Director, RopedIn Ltd



UKCW has exceeded our expectations! We've visited before but this is our first time exhibiting and we've had great conversations with a diverse range of prospects. The consistency os visitor levels across the three days has been impressive and the UKCW team have been incredibly helpful throughout.

Ross Robinson, Senior Business Development Manager, NTI

First year here, to see what's on offer. It's really good to see such a big focus on sustainability and building with timber - it's a bigger shift than I was expecting.

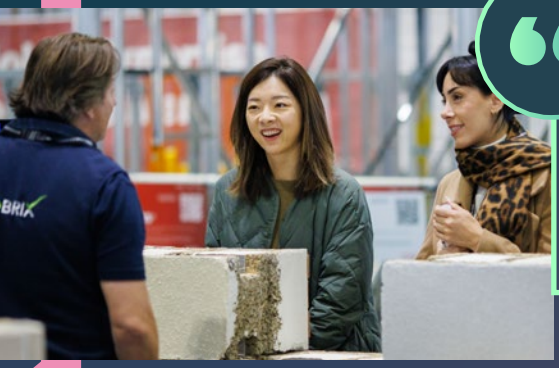
Sonja Underwood, Marketing Director, Sustainable Timber Association

There's plenty of decision-makers here that's for sure! There's been a steady flow of visitors throughout the three says and the quality of conversations has been excellent. This has been far better than any other trade show we've done.

Paul Kelly, Head of Operations, JT Lifestyle Homes

It was great connecting with a wide range of industry professionals including , housing associations, contractors, architects, and directors, M&E installers while discussing the future of smarter and more sustainable energy solutions.

Youssef Abdelmegid, Business Development Executive, Allume Energy



The variety is impressive, it's all here, and there's a good focus on sustainability and environmental credentials, so that's impressed me too.

Tom Sellwood, Regional Sales Manager, Kronospan

The merger between both shows for the first time has definitely been a success! So much engagement with us all at The Chartered Institute of Building (CIOB), demonstrating the desire for high standards and a level of professionalism within this wonderful industry of ours.

Julie Walters, Business Development Manager (London North & Hemel Hempstead & Continental Europe), CIOB
